Full stack DEVELOPER

Sofiia Shevtsova

"Self-development is the way to self-knowledge"

I am a junior full stack developer, looking for a full-time position at a company that is actively developing and helping people to develop their business and interests with the help of IT. I want to become a good developer, so I study hard and am interested in all the new things in the IT field. So far I have nice knowledge of HTML, CSS, JavaScript, and React. I also studied Node.js in order to better understand the interaction of back-end and front-end. I like to communicate with people and I working in a big team. I never stop at on my way and move on. I am Ukrainian. I currently live in Poland, but I am ready to change my country of residence if necessary.

PS: "I love green"

My projects

1. [Kvazar](#)

Website for an artificial Christmas tree manufacturing company. As part of a six-person team development using React, I was responsible for developing the start page, user registration and login functionality, and the shopping list page.[HTML5, CSS3, React, Mui]

2. [Factory Wise](#)

A modern platform for dropshipping, connecting manufacturers and sellers. As part of a six-person team development using React, I was involved in creating the start page, user registration and login sections, as well as the wishlist page.[HTML5, CSS3, React, Mui]

3. [Ice cream made with passion](#) [Link to GitHub](#)

An ice cream shop website built with Parcel by a team of five developers. I personally worked on the header and the section-hero. Created animations and transitions during events. [HTML5, CSS3]

4. [FilMOTEKA](#) [Link to GitHub](#)

A site for finding movies. Developed by a team of 8 members. I was personally involved in storing the selected films in LocalStorage and displaying them on the library page. I also worked with requests for movie genres and processing the response to this request.[HTML5, CSS3, JS, REST API]

5. [Travel App](#) [Link to GitHub](#)

A site for searching and booking trips with a convenient interface. Was developed by me personally.[React, Redux, TS, API]

6. [Game](#) [Link to GitHub](#)

A site that contains two games and a calculator. Written in pure JavaScript without the use of libraries.[HTML5, CSS3, JS]

7. [My notes and list-buy](#) [Link to GitHub](#)

A site for organizing your classes. Developed independently. Shows working with local storage. Adding elements to the DOM using JS.[HTML5, CSS3, JS]

8. [So Yummy](#) [Link to GitHub](#)

A cooking website built with React by a team of six developers. I personally worked on the start, registration, login and shoppingList page.[HTML5, CSS3, React, Redux]

Experience

Front-End Developer

Factory Wise

from July 2024 | Ukraine

- Developed user interfaces and front-end functionalities utilizing React.js.
- Optimized component performance to ensure responsiveness across various web platforms and browsers.
- Translated design specifications and wireframes into high-fidelity code implementations.
- Integrated with RESTful APIs to implement core application logic and data exchange.

Front-End Developer

Big Orange Cat

March 2024 - July 2024 | Ukraine

- Contributed to the development of user-centric features employing React.js framework.
- Enhanced component efficiency and ensured cross-platform compatibility for optimal user experience.
- Implemented user interface designs and wireframes with precision and adherence to specifications.

- Established connectivity with backend systems via REST APIs to facilitate application functionalities.

Full-stack Developer

Baza Trainee Ukraine

September 2023 - April 2024 | Ukraine

- Conducted client consultations to ascertain project requirements and objectives.
- Developed front-end applications utilizing Next.js framework.
- Participated in the evaluation and selection of appropriate technological solutions for project execution.
- Contributed to task allocation and team coordination for efficient project management.

Freelance Developer

Freelance

2022 - 2023 | Poland

- Engaged with clients to define project scope and deliverables.
- Developed and deployed websites based on client specifications.
- Formulated project development strategies and timelines.
- Determined and communicated realistic project completion schedules.

Production Technician

Seconix

2020 - 2022 | Poland

- Performed quality assurance inspections on optical device circuit boards using automated testing equipment.
- Maintained and operated testing machinery in accordance with established protocols.

Inspector, Administrative Practice Monitoring

National Police of Ukraine

2011 - 2020 | Ukraine

- Conducted quality control reviews of administrative documentation to ensure compliance.
- Operated technical devices to access, extract, and manage data in accordance with regulations.
- Facilitated interdepartmental communication and coordination within the police force.
- Managed and updated information within police databases, ensuring data accuracy and integrity.
