Russian - Advanced

Full stack DEVELOPER

Sofiia Shevtsova

"Self-development is the way to self-knowledge"
I am a junior full stack developer, looking for a full-time position at a company that is actively developing and helping people to develop their business and interests with the help of IT. I want to become a good developer, so I study hard and am interested in all the new things in the IT field. So far I have nice knowledge of HTML, CSS, JavaScript, and React. I also studied Node.js in order to better understand the interaction of back-end and fron-end. I like to communicate with people and I working in a big team. I never stop at on my way and move on. I am Ukrainian. I currently live in Poland, but I am ready to change my country of residence if necessary.

My projects

1. **So Yummy**   **Link to GitHub**
A cooking website built with React by a team of six developers. I personally worked on the start, registration, login and shopingList page.[HTML5, CSS3, React, Redux]

2. **Ice cream made with passion**   **Link to GitHub**
An ice cream shop website built with Parcel by a team of five developers. I personally worked on the header and the section-hero. Created animations and transitions during events. [HTML5, CSS3]

3. **Filmoteka**   **Link to GitHub**
A site for finding movies. Developed by a team of 8 members. I was personally involved in storing the selected films in LocalStorage and displaying them on the library page. I also worked with requests for movie genres and processing the response to this request.[HTML5, CSS3, JS, REST API]

4. **Travel App**   **Link to GitHub**
A site for searching and booking trips with a convenient interface. Was developed by me personally.[React, Redux, TS, API]

5. **Promptopia**   **Link to GitHub**
My firs project with Next.js and NextAuth. The site where you can share your prompt. Was developed by me personally.[Next.js, Node.js, TS, API]

6. **Image search**   **Link to GitHub**
Image search site. Developed by me on the Parcel assembly. The functions of infinite scrolling are implemented, there is also smooth scrolling. Working with API requests. [HTML5, CSS3, JS, API]

7. **Phonebook**   **Link to GitHub**
Application for user authorization. The user's private collection of contacts. Developed independently. Shows working with Chakra ui. Adding elements to the DOM using React.[HTML5, CSS3, React, JS, Chakra ui]

8. **Bobrus-cake**   **Link to GitHub**
A one-page website designed for a sole proprietor who makes custom cakes. Developed using React and Chakra. Adaptive layout for three types of devices (desktop, tablet, mobile phone)[HTML5, CSS3, React, JS, Chakra ui]

9. **Game**   **Link to GitHub**
A site that contains two games and a calculator. Written in pure JavaScript without the use of libraries.[HTML5, CSS3, JS]

10. **My notes and list-buy**   **Link to GitHub**
A site for organizing your classes. Developed independently. Shows working with local storage. Adding elements to the DOM using JS.[HTML5, CSS3, JS]
